**FCI**®

a ZEISS company

FCI S.A.S. is a world leader in the development of a wide range of ophthalmic surgical devices.

Since the company's inception in 1984, the innovative developments of FCI have helped physicians to solve problems related to epiphora, dry eye, eyelids, and orbital surgery, thanks to a wide range of innovative ophthalmic devices such as self-retaining intubation sets, lacrimal balloon catheter, injectable monocular intubation, permanent punctal plugs, eyelids and orbital implants.

FCI performs extensive research and development to provide physicians with outstanding products that enhance the efficiency and effectiveness of surgical procedures.

**This line of product is FCI latest commitment to provide you high performance products in oculoplastic surgery.**

# POLYVINYLPYRROLIDONE (PVP)

PVP\* is an exclusive surface treatment applied to FCI lacrimal products to improve the hydrophilic properties of silicone. The benefit of such a treatment is to enhance the efficiency of tear drainage and to limit the accumulation of debris at the surface of our silicone intubations and perforated plugs.

## PUNCTAL STENOSIS

FCI PVP perforated plugs are used to treat excessive tearing due to partial occlusion of punctum and punctal stenosis. They act as a conformer by keeping the punctal opening dilated for several weeks, allowing tears to be drained through.

### PVP Perforated Plugs

Designed by J.-A. Bernard, M.D.

- PVP coated medical grade silicone
- Slanted collarette for a perfect anatomical fit against the eyelid margin
- Exclusive polishing for a perfectly smooth surface
- 2 models available: standard & mini
- Preloaded on a disposable plug inserter to facilitate the insertion
- Sterile

PACKAGING		
S1.3511	Preloaded PVP perforated plug	Box of 1
S1.3512	Preloaded PVP perforated plug	Box of 2
S1.3521	Preloaded mini PVP perforated plug	Box of 1

DACRYOCYSTOPLASTY

Ophtacath®

Ophtacath® is a lacrimal duct balloon catheter kit indicated for the dilation of an obstructed nasolacrimal duct. It consists of a semi-flexible stainless stylet covered by a tubing and finished by a Nylon Polyn® balloon. The balloon catheter works with a disposable inflation system to dilate the obstructed nasolacrimal duct, which is a most efficient solution to treat rapidly and durably the symptoms of epiphora.

- Easy to insert & to remove
- Exclusive tapered tip
- Exclusive balloon design retains folding memory
- Highly precise inflation system
- Available in 2 diameters: 2 mm (infants) & 3 mm (adults)
- Unilateral or bilateral versions
- Includes disposable inflation device
- Sterile

Video

The Ophtacath® lacrimal balloon catheter kit is assembled by FCI S.A.S. - Notified Body: GMED CE n°0459.

# INTUBATION SETS

## MONOCANALICULAR INTUBATION

### Mini-Monoka®

Designed by B. Fayet, M.D. & J.-A. Bernard, M.D.

FCI  
EXCLUSIVE

- Indicated for monocular lacerations
- Gold standard for canalicular repair
- Requires 0.3 mm punctum plug dilator & plug inserter (S1.3090)
- Medical grade silicone – PVP option
- Sterile

		TUBE		PACKAGING
		DIAMETER	MATERIAL	
S1.1500	Mini-Monoka®	0.64 mm	Silicone	Box of 3
S1.1520	Mini-Monoka®	0.64 mm	Silicone + PVP	Box of 3

The Mini-Monoka® is a Class IIb medical device manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459.

## MONOCANALICULAR NASOLACRIMAL INTUBATIONS

### LacriJet®

LacriJet® is FCI latest and exclusive preloaded & self-retaining monocanalicular nasolacrimal intubation indicated for epiphora, congenital nasolacrimal duct obstruction and canalicular laceration.

It consists of a single use injector handpiece into which a silicone tube is preloaded inside a metallic guide. LacriJet® has been specifically designed to reduce operating time, either in the intubation phase as well as for the removal of the device.

LacriJet® is first introduced into the nasolacrimal duct.

Once in position, the sliding piston is retracted and the silicone intubation is released.

It is maintained in place at the punctum by a plug-like fixation head: no nasal retrieval, no knots and no sutures are needed.

The smaller sizes LacriJet® 15 mm and 20 mm have been specifically designed for canalicular laceration repair to prevent future canalicular obstruction due to scar tissue formation

LacriJet® from 30 to 50 mm are indicated for the treatment of congenital nasocanalicular stenosis in children (12 months or over) and adults and in certain treatment of monocanalicular or mono nasocanalicular stenosis with or without associated dacryocystorhinostomy and in traumatology.

- Exclusive new injection system
- Silicone tube preloaded inside the metallic guide
- No nasal retrieval
- No knots
- No sutures
- Available in 7 lengths
- 3 mm plug collarette
- Requires sizer (S1.1288) to select the length & 0.3 mm disposable punctum dilator and plug inserter (S1.3090)
- Sterile, Single use

		DIAMETER	LENGTH	PACKAGING	INDICATION

Video

The LacriJet® (Class IIb) and the disposable sizer (Class Is) are medical devices manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459.

# INTUBATION SETS

## MONOCANALICULAR NASOLACRIMAL INTUBATIONS

### Masterka®

Masterka® is one of FCI latest innovation for the treatment of congenital or acquired nasolacrimal duct obstructions, canalicular lacerations or nasolacrimal imperforations in children (12 months and over) and adults

Unlike the traditional “pulled” technique in which the stent is advanced through the nasolacrimal system and retrieved through the nose by pulling on the guide probe or thread, the Masterka® has no metallic probe or suture attached to it and, therefore, it is not pulled out of the nose.

Instead, the Masterka® is pushed into the nasolacrimal duct and anchored in place at the punctum by a plug-like fixation head.

- Easy to insert
- No nasal retrieval
- No knots
- No sutures
- Requires sizer (S1.1289) to select the length & 0.3 mm disposable punctum dilator and plug inserter (S1.3090)
- Available in 3 lengths: 30, 35 and 40 mm
- 3 mm plug collarette
- Medical grade silicone
- Sterile

FCI  
EXCLUSIVE

		DIAMETER	LENGTH	PACKAGING
S1.1608	Masterka®	0.90 mm	30 mm	Box of 1
S1.1609	Masterka®	0.90 mm	35 mm	Box of 1
S1.1610	Masterka®	0.90 mm	40 mm	Box of 1

Video

The Masterka® (Class IIb) and the disposable sizer (Class Is) are medical devices manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459.

FCI Monoka® intubation systems have been designed to effectively treat nasolacrimal duct obstructions, canalicular stenosis and canalicular lacerations in children (12 months and over) and adults. The stents are securely anchored at the punctum by a plug-like fixation head.

## Self-threading Monoka® (Ritleng® type)

Designed by B. Fayet, M.D. & J.-A. Bernard, M.D.

- 3 mm medium or 4 mm wide plug collarette
- PEEK (PolyEtherEtherKetone) black thread
- Requires 0.3 mm punctum plug dilator & plug inserter (S1.3090)
- To use with Ritleng® set of instruments (S1.1460, S1.1470, S1.1480)
- Medical grade silicone – PVP option
- Sterile

		COLLARETTE	TUBE		PACKAGING

S1.1810	Self-threading Monoka®	Medium	0.64 mm	Silicone	Box of 3
S1.1820	Self-threading Monoka®	Wide	0.64 mm	Silicone + PVP	Box of 3

## Monoka® of Fayet (Crawford Guide)

Designed by B. Fayet, M.D. & J.-A. Bernard, M.D.

- 3 mm medium or 4 mm wide plug collarette
- Stainless steel probe with non-traumatic rounded olive tip
- Requires 0.3 mm punctum plug dilator & plug inserter (S1.3090)
- To use with the Crawford hook (S1.1275) for endonasal retrieval of the probe
- Medical grade silicone
- Sterile

S1.1710	Monoka®	Medium	0.64 mm	Silicone	Box of 3

### Punctum dilator and plug inserter

- Necessary for the plug insertion of the Masterka®, Monoka®, Mini Monoka®, self-threading Monoka® & Monoka of Fayet® plugs

		Single use	PACKAGING
S1.3090	Punctum dilator and plug inserter		Box of 3

The Monoka® intubation system (Class IIb) and the disposable punctum dilator and plug inserter (Class Is) are medical devices manufactured by FCI S.A.S. Notified Body: GMED CE n°0459.

BICANALICULAR INTUBATIONS

Autostable Bicanaliculus Intubation Set II

The Autostable Bicanaliculus Intubation Set II is indicated to treat punctal stenosis, horizontal lacrimal duct obstruction and canalicular laceration.

Thanks to the rigid guides inside the silicone tube, the placement of the Autostable Bicanaliculus Intubation Set II is straightforward, and can be done as an office procedure.

- Silicone wings at each end ensure the stability in the lacrimal sac
- Central mark to control tube placement
- Supplied with disposable dilator
- Available in 3 lengths: 25, 30 and 35 mm
- Requires sizer (S1.1289) to select the appropriate length
- Medical grade silicone
- Sterile

		LENGTH	TUBE DIAMETER	MATERIAL	PACKAGING

Sizer for Autostable Bicanaliculus Intubation Set II

		Single use	PACKAGING
S1.1289	Sizer for Autostable Bicanaliculus Intubation Set II		Box of 5

The Autostable Bicanaliculus Intubation Set II (Class IIb) and the disposable sizer (Class Is) are medical devices manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459.

# INTUBATION SETS

## BICANALICULAR NASOLACRIMAL INTUBATIONS

### FCI Nunchaku®

FCI Nunchaku® is a pushed silicone self-retaining bicanalicular nasolacrimal intubation stent that acts like a conformer, allowing tears to be drained by capillarity.

The metallic guides are located inside the lumen, not as an extension of the stent as in conventional intubation sets. Therefore, no nasal retrieval is needed.

The stability is guaranteed by the design of the silicone tubes: no need to make knots and sutures in the nasal fossa.

- Indicated for acquired nasolacrimal duct obstruction, nasolacrimal imperforations, and dacryocystorhinostomy (DCR)
- No nasal retrieval
- No knot or suture needed
- Available in 2 lengths: 90 mm and 105 mm
- Medical grade silicone
- Sterile

		LENGTH	TUBE DIAMETER	MATERIAL	PACKAGING
S1.1361	FCI Nunchaku®	90 mm	1 mm	Silicone	Box of 1
S1.1371	FCI Nunchaku®	105 mm	1 mm	Silicone	Box of 1

FCI  
EXCLUSIVE

Video

The FCI Nunchaku® is a Class IIb medical device manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459.

Ritleng® intubation system consists of a silicone (or PVP coated silicone) tube connected at each extremity to a Poly Ether Ether Ketone (PEEK) thread guide to reduce time and trauma in lacrimal duct intubation surgery.  
The procedure involves inserting the hollow Ritleng® Probe into the nasolacrimal duct and feeding the thin PEEK thread through it.  
The probe is then withdrawn, leaving the PEEK to pull the silicone tubing into place.

BICANALICULAR NASOLACRIMAL INTUBATIONS

Ritleng®+  
Autostable Ritleng® Intubation

Ritleng®+ is FCI latest autostable bicanalicular nasolacrimal intubation indicated for acquired nasolacrimal duct obstruction, nasolacrimal imperforations, and dacryocystorhinostomy (DCR).  
It consists of a silicone tube connected at each extremity to a PEEK thread guide. It is designed to reduce operating time and trauma for the patients, either in the intubation phase as well as for the removal of the device.  
The intubation is self-retaining thanks to two wider silicone portions on the silicone tube. The surgical procedure is similar to the conventional Ritleng® lacrimal intubation and involves the use of Ritleng® instruments.

- Regular 0.64 mm silicone tube for a comfortable fit in the intrapalpebral loop
- Wider 0.94 mm silicone segments to be positioned in the lacrimal sac ensuring the self-retaining feature of the intubation: no need to make knots in the nasal fossa
- Black mark to control the central placement and correct positioning of the silicone tube between the two punctums
- Easy removal from the nose
- Require Ritleng® instruments (S1.1460, S1.1470, S1.1480)

# INTUBATION SETS

## BICANALICULAR NASOLACRIMAL INTUBATIONS

FCI BIKA® intubation systems have been the first models designed for bicanalicular intubation, especially in case of congenital or acquired nasolacrimal duct obstruction, canalicular lacerations, nasolacrimal imperforations and dacryocystorhinostomy (DCR). The metallic probes are securely connected at the silicone tube for an easy and safe retrieval from the nose.

Designed by J.-A. Bernard, M.D.

- Strong connection between silicone tube and metallic probe
- Rounded tip
- Many different designs available

### INFANT BIKA®

- 0.64 mm silicone tube / 55 mm long & 0.4 mm diameter metallic probe
- Probe embedded in silicone tube / Perfectly smooth junction

## STOPLOSS™ JONES TUBE

The new StopLoss™ Jones tube system puts an end to the high loss rate of ordinary Jones tubes yet is safe, effective and easy to use\*.

With a unique, patented tube design leading to exceptional levels of tube stability, and a new introducer system ensuring simple, accurate tube placement every time, the new StopLoss™ Jones tube system is designed for stability, simplicity and outstanding patient and surgeon satisfaction.

- Exceptional stability
- Easy to use
- Excellent tear drainage
- Wide range of tube sizes
- Use StopLoss™ Jones tube introducer set (S1.7500) to choose the appropriate diameter and length of tube and StopLoss™ Jones tube removal tool (S1.7600) to ensure a simple and non-traumatic removal of tube.

## SINGLE USE INSTRUMENTS

### Lacrimal dilator

- Intermediate size between the fine dilator & the Sichel Wilder mid-sized dilator

	Single use	PACKAGING
S1.4015	Lacrimal dilator	Box of 5

### Lacrimal probes

Designed by J.-A. Bernard, M.D.

- Equivalent to the Galezowski 00 probe

	Single use	PACKAGING
S1.4025	Lacrimal probe	Box of 5
S1.4030	Lacrimal probe with blunt tip	Box of 12

### Irrigation cannulas

	Single use	PACKAGING
M9278	Malet lacrimal cannula	Box of 10
S1.4050	Lacrimal cannula	Box of 12

### Ocular shield

- To protect the eye during lacrimal or lid surgery
- Use the handle to place & remove the ocular shield easily
- Not for laser treatment
- Made of PMMA
- Sterile

	Single use	PACKAGING
S6.2301	Ocular shield	Box of 1

The lacrimal dilator, the lacrimal probes (Class Is) and the ocular shield (Class IIa) are medical devices manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459. The Malet lacrimal cannula is a Class IIa medical device manufactured by Sterimedix Ltd. - Notified Body: TUV SUD Product Service GmbH CE n°0123. The lacrimal cannula is a Class IIa medical device manufactured by ANODYNE / PSI EYE-KO INC - Notified Body: BSI CE n°0086.

# PERMANENT PLUGS

## PAINLESS PLUG®

FCI Painless Plug® is the ultimate result of our extensive research on dry eye syndrome for the last 30 years.

It relieves the discomfort associated with dry eye syndrome simply, quickly, effectively & durably and greatly improves the patients quality of life.

- FCI exclusive innovation
- One size fits all – No sizing needed
- Very high retention rate
- No dilation needed
- Ultra thin collarette
- Preloaded on disposable inserter
- Medical grade silicone
- Sterile

FCI

# PTOSIS

## PTOSE-UP®

FCI Ptose-up® is a strip of biomaterial made of expanded Poly Tetra Fluoro Ethylene (ePTFE) used to join the upper eyelid to the frontalis muscle in ptosis surgery with frontalis suspension.

- Used successfully for more than 30 years
- Ready-to-use
- Biocompatible
- Biointegrable (70µm pores)
- Excellent tolerance
- No need for autologous tissue
- **New feature: needles with ultra sharp tips attached to the Ptose-up® to facilitate the strip insertion**
- Strip: 150 mm long & 0.35 mm thick
- Two widths available : 2 mm & 3 mm
- Needles: 58 mm long
- Sterile

		WIDTH	MATERIAL	PACKAGING
S3.3001	Ptose-up®	3 mm	ePTFE	Box of 1
S3.3021	Ptose-up®	2 mm	ePTFE	Box of 1

Designed by J.-M. Ruban, M.D.

## PTOSIS SLING SET

FCI Ptosis sling set is indicated for ptosis surgery with frontalis suspension.

- Improved needles with ultra sharp tips
- Silicone tubing
- **New feature: silicone fixation sleeve for better tension / traction control**
- Perfect connection between silicone tubing & needles
- No need for autologous tissue
- To position the fixation sleeve, we recommend to use the Watzke forceps (S5.3100)
- Needles: 58 mm long
- Sterile

		MATERIAL	PACKAGING
S3.1000	Ptosis sling set	Metallic needle, silicone tubing	Box of 3

Designed by J.L. Louquet, M.D. & D. Guerin, M.D.

The Ptose-up® and the ptosis probe are Class IIb medical devices manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459.

## EYELID IMPLANTS

FCI eyelid implants are indicated for the treatment of the functional defects of lagophthalmos resulting from facial paralysis.

### OCULID GOLD SLIM® - OCULID PLATINUM SLIM®

OCULID® implants conform to the surface curvature of the eye, offering superior cosmesis and aesthetic satisfaction among patients. Additionally, they feature a sleek surface, anatomically friendly curvature with tapered edges, and smoothly rounded corners.

- Available in platinum or gold
- Superior eyelid cosmesis
- Weight range from 0.6 g to 1.8 g
- 0.6 mm thickness / 5 mm width
- Enhanced patient satisfaction
- Sterile

#### Oculid Platinum Slim®

- Smallest implant available: 11% higher density than gold
- Excellent biocompatibility
- Proven for gold-sensitive patients

	Platinum	WEIGHT	PACKAGING
S3.6006		0.6 g	Box of 1
S3.6008		0.8 g	Box of 1

## OCULID® SIZING SET

OCULID® sizing set assists in selecting the appropriate implantable or external eyelid weight. The eyelid should close without difficulty and induce a slight ptosis of 1.0 mm.

This set includes:

- A storage case
- 7 sizing weights from 0.6 g to 1.8 g
- 100 double-sided hypoallergenic adhesive strips
- Skin tone selector card to best match patient’s complexion
- For external use only
- Reusable, non-sterile

	PACKAGING
S3.7000 OCULID® sizing set	Box of 1

Video

Oculid gold ® eyelid implants are Class IIb medical devices manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459. The Oculid® sizing set is a Class I medical device manufactured by FCI S.A.S.

## OCULID® EXTERNAL EYELID WEIGHTS

OCULID® External Eyelid Weights provide those with lagophthalmos as a result of temporary facial paralysis or Bell's palsy with an immediate and easy to apply treatment.

- Easy-to-use
- Effective non-surgical eyelid closure treatment
- Available in 5 skin tones
- Weight range from 0.6 g to 1.8 g
- Supplied with 100 double-sided hypoallergenic adhesive strips
- Non-implantable, Non sterile
- Box of 1

# ORBITAL IMPLANTS

## EZYPOR®

EZYPOR® is FCI ultimate high density polyethylene orbital implant with innovative suturing platform.

EZYPOR® has a smooth anterior suturing surface with 8 suture tunnels allowing multiple suturing options.

The use of FCI sizer set (S6.3060) is recommended to select the appropriate implant diameter which is essential to reach the utmost final cosmetic result.

Then, EZYPOR® is gently inserted into the eye socket with a sphere introducer (S6.3050).

- Indicated for enucleation, evisceration and secondary implantation
- Made of Ultra High Molecular Weight PolyEthylene (UHMWPE)
- Porosity between 40 and 60% for optimum colonization of fibrovascular tissues
- Smooth anterior suturing platform with 8 suture tunnels to facilitate needle insertion and muscles fixation
- No need for autologous graft
- Sterile

Video

\*EZYPOR® 12 mm and 14 mm do not have suturing platform.

The EZYPOR® orbital implants are Class IIb medical devices manufactured by FCI S.A.S. - Notified Body: GMED CE n°0459.

BIOCERAMIC ORBITAL IMPLANT

FCI Bioceramic orbital implants have become the new standard in orbital implant material.

These implants have an improved vascularization structure over other existing alternatives, allowing for quick fibrovascularization.

This bioceramic material is a biocompatible, bioinert, nontoxic, and non-allergenic substance. These implants are well-known by surgeons as a stable and easily handled implant for use in enucleation and evisceration procedures.

- Indicated for enucleation, evisceration and secondary implantation
- Made of 99% pure alumina (Al<sub>2</sub> O<sub>3</sub>)
- Material used in orthopaedic and dental fields with success for more than 30 years
- Porosity range: 200-550 μm
- Uniform interconnected pores, 85% of the total volume between 200 and 300 μm
- Strong and non-brittle material
- Rapid & complete fibrovascularisation
- Lightweight
- Easy to insert: less sticky & no velcro effect
- Low tissue reaction & low exposure rate
- Regular surface: less irritation & less inflammation
- 2 alternatives: sphere or egg shaped
- Sterile

## ORBITAL IMPLANT

### HYDROXYAPATITE (HA) ORBITAL IMPLANT

FCI synthetic hydroxyapatite implants offer a cost effective and environmentally conservative alternative to natural hydroxyapatite.

- Indicated for enucleation and evisceration
- Made of totally synthetic hydroxyapatite
- Porosity range: 300 – 500 $\mu$ m
- Sterile

	HA	DIAMETER	PACKAGING
S6.2010		10 mm	Box of 1

# ACCESSORIES

## CONFORMERS

Perforated conformers from FCI maintain the conjunctival cul-de-sacs after enucleation or evisceration without hindering lid closure.

- Perforations allow for post-operative instillation of eye drops and drainage of secretions
- Available in 2 models: rigid or flexible
- Translucent
- Single use

### Rigid conformers

- Made of polyamide 12
- Available in 3 sizes
- Sterile

A6.4000	Halsted mosquito forceps 10 cm, serrated jaws	Box of 1
A6.4010	Halsted mosquito forceps 10 cm, 1x2 teeth	Box of 1
A6.4100	Serrefine	Box of 1
A6.6210	Green fixation forceps 10 mm	Box of 1
A6.7110	Bonn forceps 10 cm	Box of 1
A6.8000	Paufique forceps 0.5 mm teeth	Box of 1
A6.8030	Castroviejo suturing forceps 1x2 teeth 0.30 mm	Box of 1

The reusable instruments are Class I medical devices manufactured by FCI S.A.S.

# OCULOPLASTICS INSTRUMENTS

## INDEX

### BONE NIBBLING RONGEUR

<b>F958A</b>	Kerrisson bone nibbling rongeur	P. 23
--------------	---------------------------------	-------

### CALIPER

<b>F180A</b>	Castroviejo caliper	P. 24
--------------	---------------------	-------

### CANNULAS

<b>F500B</b>	Galezowski cannula straight, 14 mm	P. 24
<b>F501C</b>	Galezowski cannula long, 18 mm	P. 24

### CURETTES

<b>F956C1</b>	J.-A. Bernard lacrimal curette	P. 23
<b>F956C</b>	Meyerhoefer Chalazion curette, Ø 1,5 mm	P. 37
<b>F956C2</b>	Meyerhoefer Chalazion curette, Ø 2,5 mm	P. 37

### DILATORS

<b>A8.4000</b>	Sichel Wilder lacrimal dilator, fine taper	P. 30
<b>A8.4010</b>	Sichel Wilder lacrimal dilator, medium taper	P. 30
<b>A8.4020</b>	Sichel Wilder lacrimal dilator, heavy taper	P. 30
<b>A8.4050</b>	Double-end lacrimal dilator	P. 30

### EYE SPECULUM

<b>A1.1400</b>	Castroviejo eye speculum	P. 47
----------------	--------------------------	-------

### FORCEPS

<b>A6.2020</b>	Desmarres Chalazion forceps 20 mm	P. 39
<b>A6.2026</b>	Desmarres Chalazion forceps 26 mm	P. 39
<b>A6.3000</b>	Barraquer Cilia forceps	P. 39
<b>A6.3100</b>	Dressing forceps	P. 39
<b>A6.3120</b>	Tissue forceps	P. 25 - 39
<b>A6.3150</b>	Adson-Brown forceps	P. 39 - 47
<b>A6.3160</b>	Adson tissue forceps 1x2 teeth	P. 39 - 47
<b>A6.4000</b>	Halsted mosquito forceps 10 cm, serrated jaws	P. 25 - 47
<b>A6.4010</b>	Halsted mosquito forceps 10 cm, 1x2 teeth	P. 25 - 47
<b>A6.4100</b>	Serrefine	P. 47
<b>A6.5130</b>	Monofilament tying forceps, curved, flat handle, titanium	P. 25
<b>A6.6210</b>	Green fixation forceps 10 mm	P. 47
<b>A6.7110</b>	Bonn forceps 10 cm	P. 47
<b>A6.7140</b>	Bonn forceps, flat handle, titanium	P. 25
<b>A6.8000</b>	Paufique forceps 0.5 mm teeth	P. 25 - 47
<b>A6.8030</b>	Castroviejo suturing forceps 1x2 teeth 0.30 mm	P. 47
<b>A6.8050</b>	Castroviejo suturing forceps 1x2 teeth 0.50 mm	P. 47
<b>S5.3100</b>	Watzke forceps	P. 39
<b>S6.3050</b>	Sphere introducer	P. 47

HOOKS		
A2.4010	Graefe muscle hook	P. 46
A2.4200	Gillies lid hook large	P. 37
A2.4210	Gillies lid hook small	P. 37 - 40
A2.4220	Ferron double hook	P. 37

LACRIMAL PROBES		
A8.4060	Bernard lacrimal probe	P. 23
A8.4110	Galezowski lacrimal probe 000	P. 23
A8.4120	Galezowski lacrimal probe 00	P. 23
A8.4130	Galezowski lacrimal probe 0	P. 23
A8.4140	Galezowski lacrimal probe 1	P. 23
A8.4150	Galezowski lacrimal probe 2	P. 23
A8.4160	Galezowski lacrimal probe 3	P. 23
A8.4170	Galezowski lacrimal probe 4	P. 23
A8.4180	Galezowski lacrimal probe 5	P. 23

LID PLATE		
A1.2100	Jaeger lid plate	P. 37

LID RETRACTORS		
A1.2010	Desmarres lid retractor 10 mm	P. 37
A1.2012	Desmarres lid retractor 12 mm	P. 37
A1.2014	Desmarres lid retractor 14 mm	P. 40

NEEDLE HOLDERS		
A7.1000	Castroviejo needle holder, standard jaws, straight	P. 24 - 37
A7.1010	Castroviejo needle holder, standard jaws, CURVED	P. 24 - 37
A7.1100	Castroviejo needle holder, delicate jaws, straight	P. 37
A7.3200	Cornic needle holder, 13 cm	P. 24
A7.1110	Castroviejo needle holder, delicate jaws, curved	P. 46

RETRACTORS		
A9.2100	Knapp retractor, 4 blunt prongs	P. 24

SCISSORS		
A3.1200	Sevrin Stevens tenotomy scissors, straight, blunt tips	P. 24 - 38
A3.1210	Sevrin Stevens tenotomy scissors, curved, blunt tips	P. 24 - 38 - 46
A3.1220	Sevrin Stevens tenotomy scissors, straight, pointed tips	P. 38
A3.1230	Sevrin Stevens tenotomy scissors, curved, pointed tips	P. 38
A3.1300	Enucleation scissors	P. 46
A3.3000	Wescott tenotomy scissors	P. 38 - 46
A3.4010	Vannas iris scissors, curved, blunt tips	P. 24

SPOON		
F956D	Evisceration spoon, Ø 8 mm	P. 47
